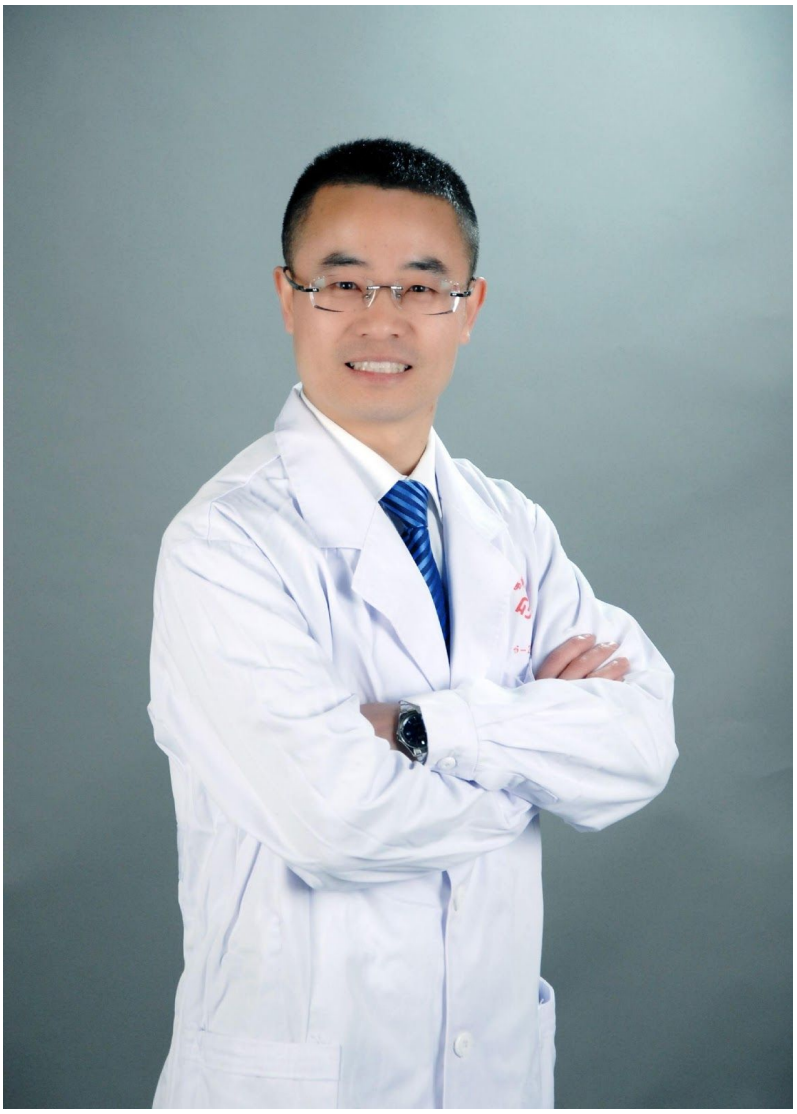
Current situation after studying in Japan



Name:Xiangdong Wang

Department : Department Of Neurosurgery, Heji Hospital, Changzhi Medical college, ChangZhi City ,Shan xi Province,China.

I was studying in the Banbuntane Hotokukai Hospital of Fujita Health University in Japan from April to June 2016.

Before I went to Japan to study, it was always my dream to learn neurosurgical techniques and knowledge in Fujita Health University and under professor Yoko Kato's supervision, because professor Yoko Kato is so famous in neurovascular diseases in the world.

During my study in Japan ,Professor Yoko Kato provided us many opportunities to see and learn surgeries at various hospitals in Nagoya . I have witnessed a number of high quality, beautiful vascular surgeries by professor Kato and endoscopic surgeries by Dr Tadashi Watanabe.

The fellowship has given me an unforgettable experience.It helped me a lot to understand many important points of neurovascular surgery and endoscopic neurosurgery.

After returning from studying in Japan, my surgical technique has been greatly improved. I have performed many operations independently, such as intracranial aneurysm clipping and transnasal neuro-endoscopic surgery to remove pituitary tumors.

I was studying in the Samii skull base surgery training center of Xuanwu Hospital in Beijing from March to September 2017.

I was studying in the Yasargil Microsurgery Training center of Xuanwu Hospital in Beijing from June to October 2018.

Certificate of Achievement

Dr. 王向东

having completed the training in
Yasargil Microsurgery Training Center
is hereby awarded this certificate

北京 CHINA
2018/06 to 2018/10

Executive President
China International Neuroscience Institute

Director
China Yasargil Microsurgery Training Center

NO. 000508

From May 2017 to June 2018, I participated in the course --Global Clinical Scholar Research Training of Harvard Medical School.
